

ACCEPTABLE USE AND INTERNET SAFETY POLICY FOR THE COMPUTER/INTERNET NETWORK OF THE BRADY PUBLIC SCHOOL DISTRICT

The Brady Public School District is pleased to make available to students access to interconnected computer systems within the District and to the Internet, the worldwide network that provides various means of accessing significant educational materials and opportunities.

In order for the Brady School District to be able to continue to make its computer network and Internet access available, all students must take responsibility for appropriate and lawful use of this access. Students must understand that one student's misuse of the network and Internet access may jeopardize the ability of all students to enjoy such access. While the School's teachers and other Staff will make reasonable efforts to supervise student use of network and Internet access, they must have student cooperation in exercising and promoting responsible use of this access.

Listed below are the provisions of your agreement regarding computer network and Internet use. If you have any question about these provisions, you should contact the building principal. If any user violates this Policy, the student's access will be denied, if not already provided, or withdrawn and he or she may be subject to additional disciplinary action.

I. PERSONAL RESPONSIBILITY

By signing the acknowledgement form that accompanies the student handbook, you are agreeing not only to follow the rules in this Policy, but are agreeing to report any misuse of the network to the person designated by the School for such reporting. Misuse means any violations of this Policy or any other use that is not included in the Policy, but has the effect of harming another or his or her property.

II. TERM OF THE PERMITTED USE

A student who submits to the School, as directed, a properly signed handbook acknowledgment form and follows the Policy to which she or he has agreed will have computer network and Internet access during the course of the school year only. Students will be asked to sign a new Policy acknowledgement form each year during which they are students in the BRADY Public School District before they are given an access account.

III. ACCEPTABLE USES

A. Educational Purposes Only.

The Brady Public School District is providing access to its computer networks and the Internet for *only* educational purposes. If you have any doubt about whether a contemplated activity is educational, you may consult with the Principal to help you decide if a use is appropriate.

B. Unacceptable Uses of Network.

Among the uses that are considered unacceptable and which constitute a violation of this policy are the following

1. Uses that violate the law or encourage others to violate the law. Don't transmit offensive or harassing messages; offer for sale or use any substance the possession or use of which is prohibited by the School District's Student Discipline Policy; view, transmit, or download pornographic materials or materials that encourage others to violate the law; intrude into the networks or computers of others; and download or transmit confidential, trade secret information, or copyrighted materials. Even if materials on the networks

are not marked with the copyright symbol, you should assume that all materials are protected unless there is explicit permission on the materials to use them. (See the Copyright and Fair Use policy with the student handbook)

2. Uses that cause harm to others or damage to their property. For example, don't engage in defamation (harming another's reputation by lies); employ another's password or some other user identifier that misleads message recipients into believing that someone other than you is communicating or otherwise using his/her access to the network or the Internet; upload a work, virus, "Trojan horse", "time bomb" or other harmful form of programming or vandalism; participate in "hacking" activities or any form of unauthorized access to other computers, networks, network components (routers, wireless access points, etc.) or information systems.
3. Uses that jeopardize the security of student access and of the computer network or other networks on the Internet. For example, don't disclose or share your password with others; don't impersonate another user. You are responsible for activity while your password is in use.
4. Uses that are commercial transactions. Students and other users may not sell or buy anything over the Internet. This includes on-line gambling. You should not give others private information about yourself or others, including full name, home address, phone number, credit card numbers and social security numbers.

C. Net Etiquette

All users must abide by rules of network etiquette, which include the following:

1. Be polite. Use appropriate language. No swearing, vulgarities, suggestive, obscene, belligerent, or threatening language.
2. Any electronic abuse of one student by another student of Brady Public School through text messaging, voice-messaging, e-mail, internet chat rooms or on social networking sites such as My Space and Facebook may be considered "bullying" as defined in student handbook. Any ongoing pattern of physical, verbal or electronic abuse is not permitted by Brady Public School.
3. Avoid language and uses, which may be offensive to other users. Don't use access privileges to make, distribute, or redistribute jokes, stories, or other materials which are based upon slurs or stereotypes relating to race, gender, ethnicity, nationality, religion or sexual orientation.
4. Don't assume that a sender of e-mail is giving his or her permission for you to forward or redistribute the message to third parties or to give his/her e-mail address to third parties. This should only be done with permission or when you know that the individual would have no objection.
5. Be considerate when sending attachments with e-mail (where this is permitted). Be sure that the file is not too large to be accommodated by the recipient's system and is in a format that the recipient can open.
6. Use of the Internet, e-mail and other actions must always be able to withstand public scrutiny without legal liability or embarrassment to the district.

IV. INTERNET SAFETY

A. General Warning: Individual Responsibility of Parents and Users

All users and their parents/guardians are advised that access to the electronic network may include the potential for access to materials, inappropriate for school-aged pupils. Every user must take responsibility for his or her use of the computer network and Internet and stay away from these sites. Parents of minors are the best guides to materials to shun. If a student finds that other users are visiting offensive or harmful sites, he or she should report such use to the person designated by the School. If a student does accidentally access this type of information, he or she should immediately notify a teacher.

B. Personal Safety

Users are always cautioned to be safe. In using the computer network and Internet, users should not reveal personal information such as a home address or telephone number. Users should not divulge real last names or any other information which might allow a person to locate the user without first obtaining the permission of a supervising teacher. Students should not, under any circumstances, arrange a face-to-face meeting with someone they “meet” on the computer network or Internet without their parent’s permission (if students are under 18). Regardless of a student’s age, he/she should never agree to meet a person with whom he/she has only communicated on the Internet, and particularly not in a secluded place or in a private setting.

C. “Hacking” and Other Illegal Activities.

It is a violation of this Policy to use the School’s computer network or the Internet to gain unauthorized access to other computers or computer systems, or to attempt to gain such unauthorized access. Any use which violated state or federal law relating to copyright, trade secrets, the distribution of obscene or pornographic materials, or which violates any other applicable law or municipal ordinance, is strictly prohibited. (See Copyright and Fair Use policy in the student handbook.)

D. Confidentiality of Student Information.

Personally identifiable information concerning students may not be disclosed or used in any way on the Internet without the permission of a parent or guardian, or if the student is 18 or over, the permission of the student himself/herself. Users should never give out private or confidential information about themselves or others on the Internet, particularly home addresses, telephone number, credit card numbers and Social Security numbers. A supervising teacher or administrator may authorize the release of directory information, as defined by state law, for internal administrative purposes or approved educational projects and activities.

E. Safety and Security of Minors when using Electronic Mail.

Chat Rooms, and other Forms of Direct Electronic Communications and Unauthorized Disclosures

1. Students will only use electronic mail, chat rooms, and other forms of direct electronic communication under the direct supervision of a teacher on a restricted/filtered computer.
2. Student users will not post or share contact information about themselves or other people. Personal contact information includes the student’s name together with other information that would allow an individual to locate the student, including, but not limited to, parent’s name, home address or location, work address or location, or phone number.
3. Elementary and middle school students will not disclose their full name or any other personal contact information for any purpose.

4. High school students will not disclose personal contact information, except to education institutes for educational purposes, companies or other entities for career development purposes, or with specific staff approval.
5. Students will not disclose names, personal contact information, or any other private or personal information about other students under any circumstances. Students will not forward a message that was sent to them privately without permission of the person who sent them the message.
6. Students will not agree, under any circumstances, to meet someone they have met online.
7. Students will promptly disclose to their teacher or other school employee any message they receive that is inappropriate or makes them feel uncomfortable. Students should not delete such messages until instructed to do so by a staff member.

F. Active Restriction Measures.

The School, either by itself or in combination with the Educational Service Unit providing Internet access, will utilize filtering software or other technologies to prevent students from accessing visual depictions that are (1) obscene, (2) child pornography, or (3) harmful to minors. The School will also monitor the online activities of students, through direct observation and/or technological means, to ensure that students are not accessing such depictions or any other material that is inappropriate for minors.

Internet filtering software or other technology-based protection systems may be disabled by a supervising teacher or school administrator, as necessary, for purposes of bona fide research or other education projects being conducted by students, age 17 and older.

The term "harmful to minors" is defined by the Communications Act of 1934 (47 USC Section 254 [h][7]), as meaning any picture, image, graphic image file, or other visual depiction that taken as a whole and with respect to minors, appeals to a prurient interest in nudity, sex, or excretion; depicts, describes, or represents, in a patently offensive way with respect to what is suitable for minors, an actual or simulated sexual act or sexual contact, actual or simulated normal or perverted sexual acts, or a lewd exhibition of the genitals; and/or, taken as a whole, lacks serious literary, artistic, political, or scientific value as to minors.

V. PRIVACY

Network and Internet access is provided as a tool for the education of every student. The School District reserves the right to monitor, inspect, copy, review and store at any time and without prior notice any and all usage of the computer Network and Internet access and any and all information transmitted or received in connection with such usage. All such information files shall be and remain the property of the School District, and no user shall have any expectation of privacy regarding such materials.

VI. FAILURE TO FOLLOW POLICY

The use of the School District's computer network and Internet access is a privilege, not a right. A user who violates this Policy shall, at a minimum, and including, loss of access, suspension and/or expulsion of students from school and loss of access, suspension, termination, non-renewal or cancellation of the contract of administrators, teachers, or other school employees. have his or her access to the computer network and Internet terminated, which the School District may refuse to reinstate for the remainder of the student's enrollment in the School District. A user violates this Policy by his or her own action or by failing to report any violations by other users that come to the attention of the user. Further, a user violates this Policy if he or she permits another to use his or her account or password to access the computer network and Internet, including any user whose access has been denied or terminated. The School District may also take other disciplinary action in such circumstances.

VII. WARRANTIES/INDEMNIFICATION

The School District makes no warranties of any kind, either express or implied, in connection with its provision of access of and use of its computer networks and the Internet provided under this Policy. It shall not be responsible for any claim, losses, damages or costs (including attorney's fees) of any kind suffered, directly or indirectly, by any user or his or her parent(s) or guardian(s) arising out of the user's use of its computer networks or the Internet under this Policy.

By signing the acknowledgment form that accompanies the student handbook, users are taking full responsibility for his or her use, and the user who is 18 or older or, in the case of a user under 18, the parents (s) or guardian (s) are agreeing to indemnify and hold the School, the School District, the Educational Service Unit that provides the Internet access opportunity to the School District and all of their administration, teachers, and staff harmless from any and all loss, costs, claims or damages resulting from the user's access to its computer network and the Internet, including but not limited to any fees or charges incurred through purchases of goods or services by the user. The user or, if the user is a minor, the user's parent(s) or guardian(s) agree to cooperate with the School in the event of the School's initiating an investigation of a user's activities during his or her access to its computer network and the Internet, whether that use is on a School computer or on another computer outside the School District's network.

VIII. UPDATES

Users, and if appropriate, the user's parents/guardians, may be asked from time to time to provide new or additional registration and account information or to sign a new Policy, for example, to reflect developments in the law or technology. Such information must be provided by the user (or his/her parent(s) or guardian(s)), or such new Policy must be signed if the user wishes to continue to receive service.

If changes occur in some or all of the information a user provides to obtain an account, the user must notify the person designated by the School to receive such information within 72 hours of the change.
